A. KISHORE

Full Stack Developer & AI Systems Engineer

Madurai, Tamil Nadu, India | Phone: +91 7904702577 | Email: kishorekevin3289@gmail.com
Portfolio: kishorekevin.vercel.app | GitHub: github.com/KISHOREkevin

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer & AI Systems Engineer with production experience designing and deploying high-reliability web applications, scalable backend microservices, and Applied AI systems. Proficient in **React.js, Node.js, Fastify, Python, Django, FastAPI, PostgreSQL, and MongoDB**. Production background developing financial trading platform integrations (MetaTrader 5 / MT5), multi-vendor authenticated APIs, and Retrieval-Augmented Generation (RAG) pipelines utilizing LangChain, Ollama, and vector similarity search. Founder of Codex Arch (custom minimal Linux OS) with proven expertise in Linux systems administration, workflow automation, and cloud deployments.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript (ES6+), TypeScript, C, Java, Lua, Bash
Frontend Technologies:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Native, Expo, Redux, GTK, Qt
Backend & APIs:	Node.js, Fastify, Express.js, Django, FastAPI, REST API Development, Microservices, Asynchronous Programming
Databases & ORMs:	PostgreSQL, MongoDB, Redis, SQL, NoSQL, Sequelize ORM, SQLAlchemy, Pydantic
AI / LLM Engineering:	Large Language Models (LLMs), RAG, LangChain, LangGraph, Ollama, Local LLMs, Vector Databases, Semantic Search, Prompt Engineering
DevOps, Cloud & Systems:	Docker, AWS (EC2, Deployments), Linux Server Administration, Git, GitHub, CI/CD, Networking Protocols, System Design

PROFESSIONAL EXPERIENCE

Wealwin Technologies — *Full Stack Developer*

Nov 2025 – Present | Madurai, Tamil Nadu, India

- Architect and maintain production full-stack web applications and microservices using **React.js, Node.js, Fastify, Sequelize**, and **PostgreSQL**.
- Develop resilient REST APIs, execute relational schema migrations, and implement JWT-based authentication and Redux state management.
- Engineer **MetaTrader 5 (MT5)** trading platform integrations, coordinating account management, automated copy-trading, and affiliate commission distribution workflows.
- Implement high-security multi-vendor APIs with API-key verification and cryptographic signature validation for institutional clients.
- Investigate and resolve critical production defects and database bottlenecks reported by live users, ensuring uninterrupted service availability.

Hashcodex / Hashcodexperts Infoservices — *Full Stack Developer*

Jul 2025 – Oct 2025 | India

- Built and scaled fintech, cryptocurrency, and trading web applications leveraging the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**.
- Engineered interactive trading chart modules and connected chart interactions with backend order-matching and order-execution lifecycles.
- Implemented secure authentication and consumed high-throughput financial REST APIs supporting real-time trading operations.
- Debugged production codebases and enhanced core features, significantly boosting transaction reliability and code modularity.

Krutanic Solutions — *Fullstack Developer Intern*

Nov 2024 – Jan 2025 | India

- Built 3+ high-performance **Django REST APIs** for real-world projects, cutting backend response times by **25%**.
- Collaborated within an engineering team to construct a cloud-deployed job portal using **Node.js, React, and AWS**.

Shrika Institute of Creative Technology — *Web Developer*

Sep 2023 – May 2025 | India

- Developed and maintained 5+ full-stack production platforms (job portals, food ordering, transcription) using MERN and Django deployed on **AWS**.
- Engineered a Video Editor Suite with real-time collaboration features (increasing user engagement by **80%**) and parallelized **FFmpeg** processing (slashing render duration by **60%**).
- Integrated speech-to-text AI/ML APIs into an automated audio transcription tool, reducing manual transcription effort by **90%**.

PROFESSIONAL EXPERIENCE (CONTINUED)

Linux Server Administration — *Linux Server Administrator Intern* Jun 2023 – Jan 2024 | India

- Administered high-uptime Linux servers, monitoring processes, logs, and resource health using **top, ps, journalctl**, and system diagnostics.
- Secured remote access protocols (**SSH, SFTP**) and troubleshot network configurations, subnets, routing, and DNS records (**netstat, ss, dig, traceroute**).
- Automated system maintenance routines, scheduled backups, and log rotations using modular **Bash** scripts.

Codex Arch — *Founder & Community Educator* Jan 2025 – Present | Open Source Community

- Developed a customized keyboard-centric Linux OS based on **Qtile, Python, and Bash**, adopted as the primary workstation OS by 10+ beta testers.
- Automated system updates and environment dotfiles via shell scripts and Git, reducing fresh deployment setup time from hours to under **5 minutes**.
- Published technical tutorials and conducted workshops on Linux administration, self-hosting, and workflow automation.

FEATURED TECHNICAL PROJECTS

AI-Powered Job Matching System | *Python, LangChain, Ollama, Vector DB, RAG, Semantic Search* github.com/KISHOREkevin/job-matcher

- Built a production-oriented RAG system parsing resumes and job postings into structured representations for automated candidate evaluation.
- Engineered document ingestion, data normalization, deduplication, and vector embedding pipelines for high-precision semantic similarity search.
- Executed local LLM inference via Ollama for zero-cost, privacy-preserving candidate matching with structured output generation.

Finowiz — MT5 Trading Platform | *MERN Stack, MetaTrader 5, Microservices, HMAC Auth* Live: finowizprime.com

- Developed trading workflows integrating MT5 with copy-trading functionality, affiliate tracking, and automated commission distribution.
- Engineered multi-vendor REST APIs secured with API keys and cryptographic HMAC signature validation for external institutional integrations.

Metiers — Multi-Provider Service Marketplace | *Node.js, Fastify, Sequelize ORM, PostgreSQL, REST APIs* Live: metiers.cd

- Architected backend microservices and high-throughput REST endpoints for a multi-vendor on-demand home service marketplace.
- Engineered relational PostgreSQL schemas and Sequelize ORM models to manage provider dispatch, customer ordering, and status lifecycles.

FFmpeg Video Converter Suite | *Node.js, FFmpeg, Docker, JavaScript, Parallel Processing* video-converters.netlify.app

- Constructed a multi-featured media processing platform supporting 8+ operations (conversion, compression, GIF extraction) handling 100+ daily concurrent tasks.
- Optimized resource utilization through worker parallelization and Docker containerization, preventing system contention under heavy workloads.

Echo — AI Audio Transcription Application | *Django, Python, AssemblyAI, Redis, Celery, Cloudinary* github.com/KISHOREkevin/audio-transcriber

- Integrated AssemblyAI speech-to-text APIs with Django backend, enabling multilingual audio transcription and speaker recognition.
- Orchestrated asynchronous Celery task queues backed by Redis to eliminate HTTP request timeouts during long audio processing.

EDUCATION

Ultra College of Engineering and Technology — *B.Tech in Information Technology* May 2021 – May 2025 | Madurai, India

- **CGPA: 8.09 / 10** | Specialization: Software Engineering, Data Structures & Algorithms, Computer Networks, Operating Systems

TVS Higher Secondary School — *Higher Secondary Certificate (HSC) & SSLC* Madurai, Tamil Nadu, India

- HSC (Class XII): **86.3%** (2020–2021) | SSLC (Class X): **78.4%** (2018–2019)

CERTIFICATIONS

- **AWS Cloud Practitioner** (AWS Training) | • **Linux Server Administration** (Cisco NDG) | • **Fullstack Development** (Krutanic Solutions)
